

I urge the continuation of satellite radio traffic and weather reports. As an over the road truck driver, I use these reports to plan my trips through congested areas. I cannot do so in advance with local radio as I'd be out of broadcast range. I know several truckers that do the same. By avoiding congested areas we truckers can get through cities faster and help relieve the congestion that is there. This nationwide resource benefits truckers and all other motorists that travel in congested areas. It is not in the public interest to deny satellite radio weather and traffic programming to truckers and others that make good use of it.
